## Disposable Pen Injector

Easy injection  
in three steps

Disposable Pen Injector

Disposable fixed dose Pen Injector

SP style Disposable Pen Injector

NEST Disposable Pen Injector is a type of liquid medicine injection device that contains a liquid medicine solution within a syringe. The medication is conveniently placed in a cartridge within the pen, eliminating the need to extract liquid medicine each time. To administer the medication, simply remove the pen cap, adjust the dial to the desired dose, and then perform the liquid medicine injection.

In addition to insulin, this device is suitable for administering various medications, including growth hormone, antibiotics, interferon, beauty drugs, biohazard emergency, hemostatic and analgesic drugs, cardiovascular emergency drugs, detoxification drugs, antipyretic and analgesic drugs, anesthetic and sedative drugs, etc.
